And whereas the Lieutenant-Governor in Council has by Order in Council made pursuant to the said Act been pleased to order that the tract of land hereinafter described and the owners thereof be incorporated into an improvement district under the said Act and has made further provision to the tenor and effect herein-after appearing:

Now KNOW YE that by these presents We do hereby order and proclaim:—

1. The tract of land comprising the parts of District Lot 2, Range 3, Coast District, to which Certificates of Title 415381, 716751, and 1162411, and Registered Plans 3679 and 3417, as amended, apply, Victoria Land Registration District, and all subdivisions thereof, and the owners of land in the said tract are incorporated into an improvement district under the "Water Act, 1939," and subject to the provisions thereof and to the conditions hereinafter contained.

2. The said improvement district shall be known as the "Bella Coola Waterworks District."

3. The objects of the said improvement district shall be the diversion, carriage, measurement, and distribution of water, and the generation, purchase, conveyance, measurement, distribution, and sale of electric energy, the provision of fire-protection, sewerage, and garbage service, and the acquisition, maintenance, and operation of works for such pur-

Forthwith after the holding of a general meeting the Trustees shall file with the Comptroller of Water Rights a true copy of the minutes of such meeting.

10. All words and phrases given special meaning in section 2 of the "Water Act, 1939," shall, where used herein, be ascribed the meaning given them in the said section unless the context otherwise requires.

PURSUANT to the provisions of the "Motor Carrier Act," the following order was made by the Public Utilities Commission on the 22nd day of May, 1944, and approved by the Lieutenant-Governor in Council on the 25th day of May, 1944, by Order in Council No. 769:—

IN THE MATTER OF THE REGULATIONS UNDER THE "MOTOR CARRIER ACT."

W. A. CARROTHERS, D.F.C., Ph.D., *Chairman.*
L. W. PATMORE, LL.B., K.C., *Commissioner.*
J. C. MACDONALD, B.A., B.E., *Commissioner.*

The 22nd day of May, A.D. 1944.

It is ordered that the regulations made by the Public Utilities Commission on the 4th day of January, 1940, pursuant to the provisions of the "Motor Carrier Act" and section 8 of the "Interpretation Act," and approved by the Lieutenant-Governor in Council on the 6th day of January, 1940, by Order in Council No. 8, and as amended from time to time, be further amended by the addition of Standards for Passenger-vehicle Construction for New Vehicles set forth in paragraphs 6.40 to 6.426 attached hereto.

"STANDARDS FOR PASSENGER- VEHICLE CONSTRUCTION FOR NEW VEHICLES.

"6.40 Applicability.

"The standards for passenger-vehicle construction as contained herein apply only to vehicles designed to carry more than twelve persons.

"6.401 Chassis.

"The gross weight of a fully loaded bus must not exceed the manufacturer's gross allowable weight as fixed by the official in charge of the engineering department of the manufacturer of the chassis. This shall be interpreted as the advertised maximum gross vehicle weight as shown in the manufacturer's regular advertising literature describing such chassis. Gross vehicle weight shall mean the actual weight of the chassis complete, plus the weight of the body, plus the weight of the driver and the weight of the passengers at 150 lb. each, and any other load. The wheel-base of any chassis as originally supplied by the manufacturer must not be altered in any manner.

"6.402 Load Distribution.

"The chassis shall be of the proper wheel-base to accommodate the body and load with the proper and accepted weight distribution to provide complete and safe control of the vehicle under all road conditions.

"6.403 Exhaust.

"The motor exhaust shall be carried to a point beyond the rear of the body skirt in an air-tight steel tube and muffler, and not beyond the rear bumper, except that where this is not feasible such exhaust shall be approved by the Commission. Where motor-vehicles are to be used in continuous urban service stack type exhaust shall be used whenever practical.

"6.404 Bodies.

"Must be of steel or wood framework and covered with steel, wood, or equivalent. Bodies shall be strong enough to withstand heavy impact through accident or collision and give the maximum protection to passengers.

"Seating and Aisles.

"(a.) Seating: All passenger-carrying vehicles shall be so constructed as to afford normal and comfortable seating accommodation for the seated passengers and all such seats shall be fully upholstered. The minimum requirements for seat centres (forward facing seats) shall be not less than 26 inches. This measurement to be taken on a horizontal line on top of seat-cushion from back of front seat to undepressed face of seat behind. The seating arrangement of every passenger-vehicle shall be such that, when all seats are fully occupied, the driver's view ahead or to the right- or left-hand sides is not obscured in any way, and that the driver at all times has free movement of his arms and legs and ready access to emergency equipment. Under no circumstances shall a passenger be permitted to ride on the left-hand side of the chauffeur:

"(b.) Movable Seats: No movable 'let-down' or 'jump' seats shall be installed without first obtaining the approval of the Public Utilities Commission:

"(c.) Centre Aisle: Shall not be less than 11 inches as measured at seat base-line and not less than 16 inches as measured at hip-level. 'Seat base-line' means a horizontal line taken on top of seat-cushion:

"(d.) Emergency Door Aisle: An unobstructed aisle of at least 10 inches shall lead to the Emergency Door. This measurement to be taken at the seat base-line.

"6.405 Interior Height.

"Interior clearance height shall not be less than 68 inches as measured at longitudinal centre line at the entrance door. Buses designed for standing passengers shall have a minimum interior clearance height of 74 inches in that portion to be occupied by standing passengers. Suitable hand-holds, straps, rails, etc., shall be provided in order to afford adequate support for standing passengers.

"Note.—The regulations pursuant to the 'Motor Carrier Act' provide that no standing passengers shall be carried unless the carrying of standing passengers is specifically permitted by the Public Utilities Commission with respect to the vehicle, as stated in the licence therefor, and then only to the number and to the extent and in the manner stated in the licence.

"6.406 Floor.

"Shall be of metal or wood and so constructed that exhaust gases, moisture, etc., can not enter the bus through the same. Slip-proof floor covering shall be provided where necessary. All closures between the bus body and the engine compartment shall be fitted with gas-tight gaskets, and pedal openings, etc., shall be closed by bellows-type gas-tight boots or the equivalent.

"6.407 Doors.

"There shall be no door at the left front of the vehicle.

"Entrance Door.

- "(a.) To be located at right side near the front of the vehicle, and shall be manually controlled by the driver; provided that such entrance door may be air or vacuum operated and, if so, the control system shall have a reserve tank or auxiliary control:
- "(b.) Shall have a minimum horizontal clearance opening of 24 inches and a vertical clearance of the maximum height in accordance with the body construction as measured from top of lower entrance step to roof:
- "(c.) A stanchion shall be provided at the rear of the entrance step well from floor to roof. Location shall not restrict passageway to less than 24 inches:
- "(d.) A safety bar shall be installed from stanchion to the body wall at a height of approximately 30 inches:
- "(e.) A suitable light shall be provided and located so as to adequately illuminate the entrance step or steps of the vehicle.

"Emergency Door.

- "(a.) Shall be located on the left-hand side at the rear:
- "(b.) Shall have a minimum horizontal clearance of 24 inches and the height shall be the maximum as permitted by body construction; provided that such door shall be adequate to allow the unrestricted exit of any passenger carried:
- "(c.) Shall be equipped with a fastening device operated by a lever or hand-levers which afford instant and easy release, but is designed to offer protection against accidental release. Control from the driver's seat shall not be permitted. Provisions for opening this door from the outside must be provided and shall consist of a handle or the equivalent, and such handle or equivalent must be of a permanent type and shall not project beyond the side of the body:
- "(d.) Shall be hinged on its forward vertical edge only.

6.408 Baggage and Express.

"If vehicle is to be used for transportation of baggage or express, adequate space must be provided to accommodate same. This space not to interfere with the free and ready entering or leaving such bus and shall be so constructed as to prevent baggage falling on to or against any passenger. All passenger baggage shall be protected from dust and moisture.

6.409 Signs.

- "(a.) *Route.*—Every public passenger-vehicle shall have firmly attached thereto on the front thereof a sign with letters not less than three (3) inches in height designating the route over which or the destination to which the vehicle is being operated. This sign shall be illuminated at night.
- "(b.) *Special Trips.*—Every licensed passenger-vehicle having a carrying capacity of more than seven (7) passengers, exclusive of the driver, while it is being operated for a charter trip shall have displayed in a conspicuous position on the front thereof a sign in plain letters not less than three (3) inches in height, reading 'CHARTERED' or 'SPECIAL.'
- "(c.) *Emergency Door.*—Every emergency door shall be provided with a sign, inside the vehicle, located on or adjacent to the said door, on which sign shall be printed in letters clearly visible and not less than one and one-half (1½) inches in height, the words 'EMERGENCY DOOR.'

"(d.) Number of Passengers to be carried.—

Every holder of a licence for a motor-vehicle shall cause to be clearly marked in a conspicuous place on both sides of the vehicle in figures or letters not less than one (1) inch in height, the maximum number of passengers that may be carried under the terms of the licence; and no person shall operate on a highway a motor-vehicle for which a licence is required unless it is marked as required by this section.

- "(e.) *Abbreviation.*—It shall constitute sufficient compliance with section 14 of the 'Motor Carrier Act' if the following abbreviations are used for marking a vehicle to show the maximum number of passengers that may be carried, as required by that section, namely:—

MAX. C. CAP. PASS.

6.410 Ventilation.

"All bodies shall be equipped with a suitably controlled ventilating system of sufficient capacity to maintain the proper quantity of air under operating conditions without the opening of windows, except in extremely warm weather. Toe-boards, dash-panels, and the engine-covers must exclude all motor fumes and gases.

6.411 Interior Lights.

"Every passenger-vehicle having a placed top, or its top up, shall have maintained a light or lights within the vehicle so arranged as to light up the whole of the interior of the vehicle, except that portion occupied by the chauffeur. Such light or lights shall be kept sufficiently lighted between the hours of sunset and sunrise at all times when the vehicle is occupied by passengers.

6.412 Glass.

"All glass in windows and doors, etc., shall be of safety type. No unpolished or unground edges shall be accessible to passengers. Glass of wire-mesh type shall not be used in any part of the body. The windshield shall be of laminated safety plate glass and shall be sloped slightly to prevent glare from other lights and large enough to permit the driver to have a clear view of the road. The glass must be of sufficient quality to prevent distortion of view from any direction.

6.413 Fuel-containers.

"No part of any fuel tank or container or intake pipe shall project beyond the sides of the motor-vehicle. The intake pipe of any fuel tank or container or any such container itself shall not be located within or above the passenger-carrying portion of any bus.
